The name Zabolfa means for me tradition, respect and progress at the same time. Our small village – Zákányszék, where we actually live and work – is located in the southern part of Hungary and was called Zabolfa around 1840's. It may be an ordinary Hungarian village, but differs in the way that the local residents have a special relationship with one another. This mutual respect and esteem develop our community's life further.

Our values are the family, the work, the love and respect of fields, and dignity for religion and our ancestors. These ensure the development of the village and each individuals.

This is what I put my belief in and what our company work alongside of as well. We are convinced the expertise that our ancestors developed by working hard can be beneficial for us to satisfy our customers.

Thereby we would like to make our world likeable and happier, where we and our children can live in safety. Every day values like health, freshness and time spent together by the table will become more important again. As the Italian people say „A tavola non s'invecchia” which means „You don't get old at the table.” This is what we would like to provide safe and delicious fruit and vegetables for.

PETER KAZI

CEO of Zabolfa Kertész Ltd.

Potatoes

Potatoes are our passion

Potatoes grown in the sandy soil of South-Hungarian region have an exceptional taste and quality, therefore their popularity has been growing year by year. We sold almost 9 thousand tonnes of potatoes in the year 2018., which was provided by our producing basis who operates on more than 500ha field. The cooling capacity of our farmers ensures constant quality and availability of red (Red scarlet, Red sonja, Mozart, Bellarosa and Manitou) and yellow (Impala, Agrya, Krone, Agatha és Toscana) varieties.

Spring vegetables are our expertise

For our spring vegetables (iceberg lettuce, flat lettuce, white and red radishes, spring onion) we have collected the most respected

For our spring vegetables (iceberg lettuce, flat lettuce, white and red radishes, spring onion) we have collected the most respected growers to meet the highest standards of our customers.

After the Hungarian season we make availability longer with Italian sources, therefore our spring vegetable production is capable of growing continuously.

[illegible]

Csongrád county is famous for the stone fruits as we have the highest number of sunny hours in the country. Hence of this fact our fruits are rich in vitamins and have exceptionally high brix. By us the traditional varieties have already been supplemented by new Italian ones, which means we associate the expertise of the past and the present.

Squashes

Squashes are our possibility

Consumption of squashes has been growing year by year, which offers possibility of development for our region. The most important line in Hungary is the butternut squash that we can offer from organic production as well. During the process of getting ripe, it turns increasingly deep orange, and becomes sweeter and richer. This makes it so popular.

Organics are our mission

Organic products means not only a trend for us, but a commitment. We believe that the fresh produce from reliable sources is the right base of our health. This is what we always bear in mind when we controll our growers and take care of our products.

Besides our local producers we cooperate with Italian ones as well, therefore our product range consists of more than 20 types of fruits and 40 vegetables.
